Easy MAM™ is a powerful media asset management platform that provides an online proxy library of digital content with rich collaboration tools while managing native resolution content in storage and archive. With a series of best-in-breed integrations, Easy MAM can provide complete integrated media workflows. Easy MAM systems range from small workgroups to large enterprise installations.

Graphics 1 : Easy MAM Main Window

Features :

- Provide a secure storage.
- Provides sending the right content to the right place.
- Multiple projects can be created.
- New users and user groups can be created.
- Be authorized to files and folders in the archive system.
- According to user needs new categories and metadatas can be added.
- User authorization is done for newly added categories and metadatas.
- Metadata information is available for the call option.
- Can be added category to the video and can be searched accordingly in the search option
- Proxy thumbnails and storyboards copies of contents can be created automatic or manual
- The conversion process of videos,sounds and pictures can be made in the archive system
- It is possible to edit and preview content.
- A new copy is created for changes to the contents. Changes made can be undone in this way.
- Users can delete or archive old content.
- All transactions made by users are logged.
- Assign tasks can be done between users.
- Software and hardware components (disk, server, software) can be managed through the interface.
- There API support for third party software.
- It has a web control interface.
- There is support for different languages.
- There are automatic load balance mechanism.

1.Settings Menu

1.1 Settings Window

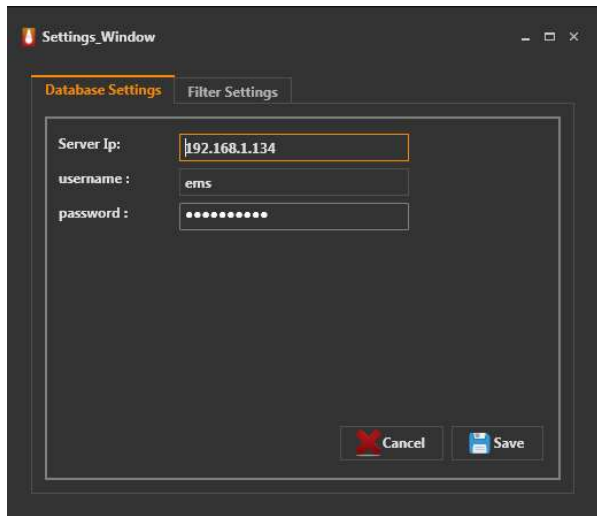

1.1.1 Database Settings

Settings menu when clicked, it will open one window as in graphics 1. In the first tab of "Settings Window" database settings are made (Graphics 2). These settings are as follows :

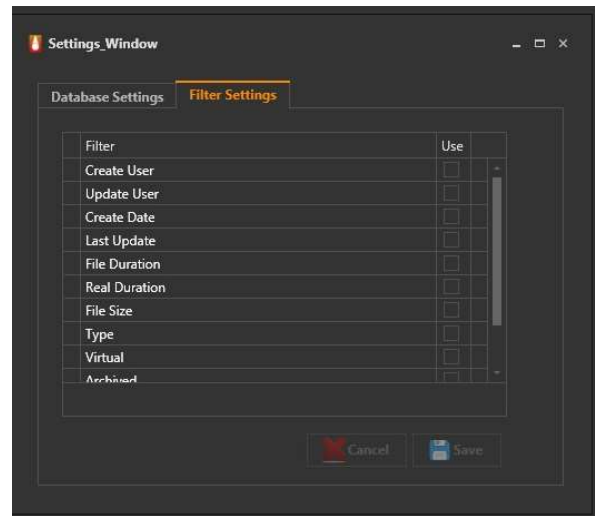

Server Ip : Sql server's IP information will be entered into.

Username : Database user name will be entered into.

Password : Database password will be entered.

Graphics 2 : Database Settings

Graphics 3 : Filter Settings

1.1.2 Filter Settings

This filtering on 3 Graphics tab in the files can be displayed according to the values shown on files are displayed according to the value

2.Help Menu

Graphics 4 : Help Menu

2.1 How to Use Window

: To add new content at list.

: Used to add a new proxy server.

: Used to add a new thumbnail.

: Used to save changes.

: Used to cancel last operation.

: Used to delete selected item.

: Used to edit selected item.

: Used for advanced search.

: Used for the regulation of authority.

: Used to refresh list.

: Used to restore deleted items.

: Used to record the changes made.

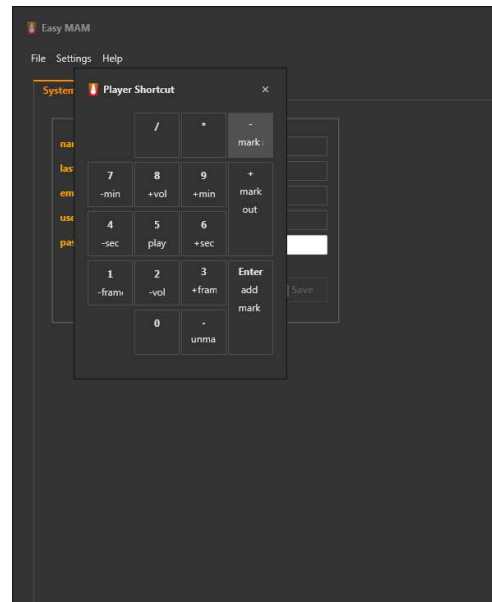

: Used to search files.

: To display the version list of the item.

Graphics 5 : How to Use Window

Graphics 6 : Player Shortcut Window

2.2 Player Shortcut

Shortcuts can be used in the program is shown in this window (Graphics 6). These are as follows:

- 1 (- frame) : Used to go back one frame on the video being played.
- 2 (- vol) : Used to decrease the volume during playback.
- 3 (+ frame) : Used to go forward one frame on the video being played.
- 4 (- sec) : Used to go back one second on the video being played.
- 5 (play) : Used to play selected video.
- 6 (+ sec) : Used to go forward one second on the video being played.
- 7 (- min) : Used to go back one minute on the video being played.
- 8 (+ vol) : Used to increase the volume during playback.
- 9 (+ min) : Used to go forward one minute on the video being played.

3.System Admin Settings

3.1 System Admin

Information of the system administrator can be edited in this section.

The screenshot shows the 'System Admin' settings form in the Easy MAM application. The form is titled 'System Admin' and has a 'Projects' tab. The fields are as follows:

name :	Doğan
last name :	Ersan
email :	dogan@devtek.com.tr
username :	admin
password :	•••••

At the bottom of the form, there are two buttons: 'Cancel' (with a red X icon) and 'Save' (with a floppy disk icon).

Graphics 7 : System Admin

3.2 Projects

Create a new project under the Projects tab or making changes to existing projects can be performed..(Graphics 8)

The screenshot shows the 'Project Settings' form in the Easy MAM application. The form is titled 'Project Settings' and has a 'Projects' tab. The form is divided into two sections: 'General' and 'User Groups'. The 'General' section has the following fields:

Server Ip :	192.168.1.134
name :	Doğan Test Project
language :	Türkçe
db_name :	EM_N_P
db_username :	ems
db_password :	••••••••

At the bottom of the form, there are two buttons: 'Cancel' (with a red X icon) and 'Save' (with a floppy disk icon).

Graphics 8 : Project Settings

3.2.1 General

Server IP = To the IP address of MAM Server to connect is entered

Name = Project name

Language = Language select

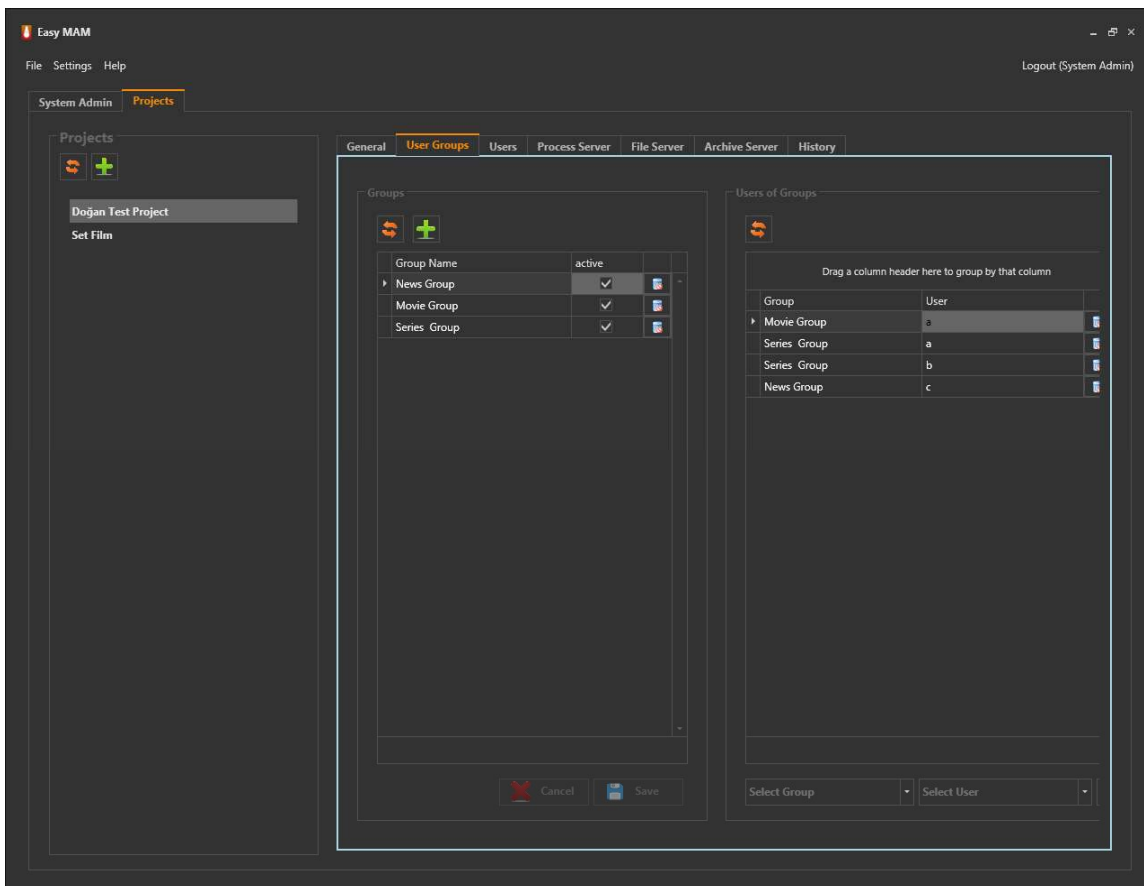

Db_name = Database name at MAM server.

Db_username = Database username

Db_password = Database password.

3.2.2 User Groups

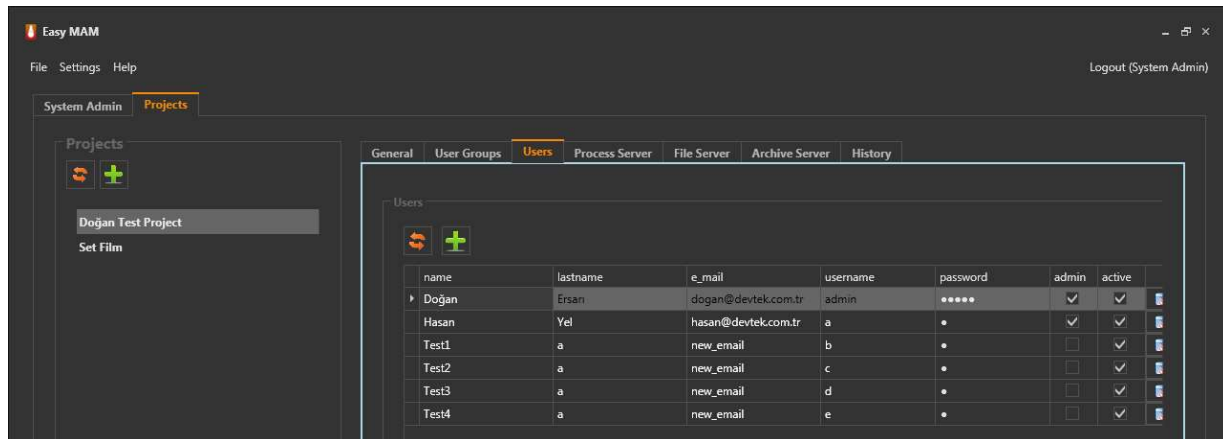

User groups and users of each group will be created or deleted in this section.(Graphics 9)

Graphics 9 : User Groups

3.2.3 Users

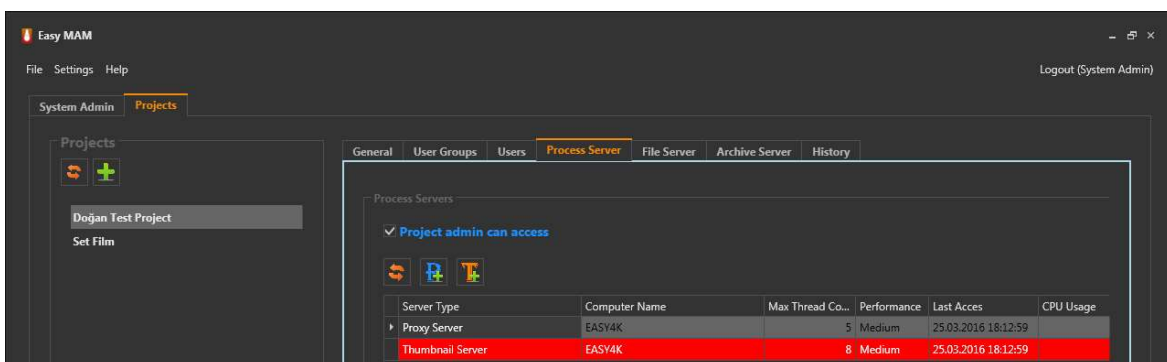

Username, password, name, surname, e-mail address, authentication will be performed in this section.(Graphics 10)

Graphics 10 : User Settings

3.2.4 Process Server

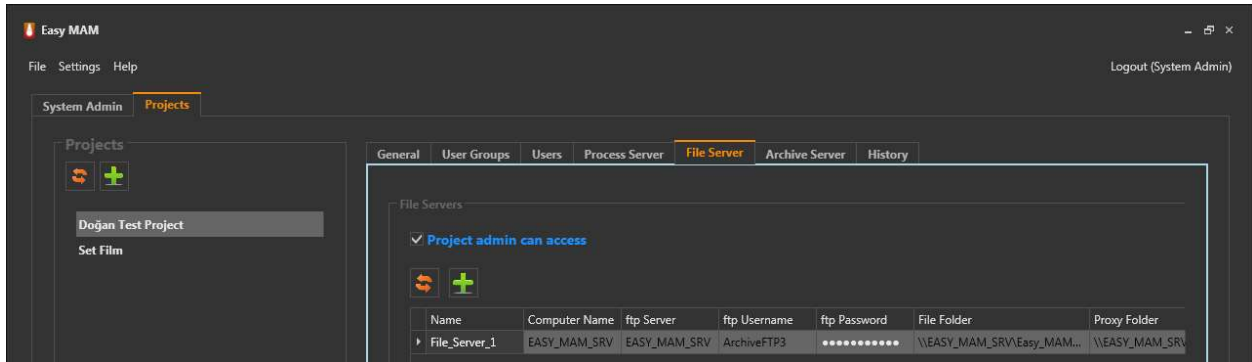

Proxy and thumbnail servers are added and displays in this section.(Graphics 11)

Graphics 11 : Process Server

3.2.5 File Server

File server settings are made in this section.(Graphics 12)

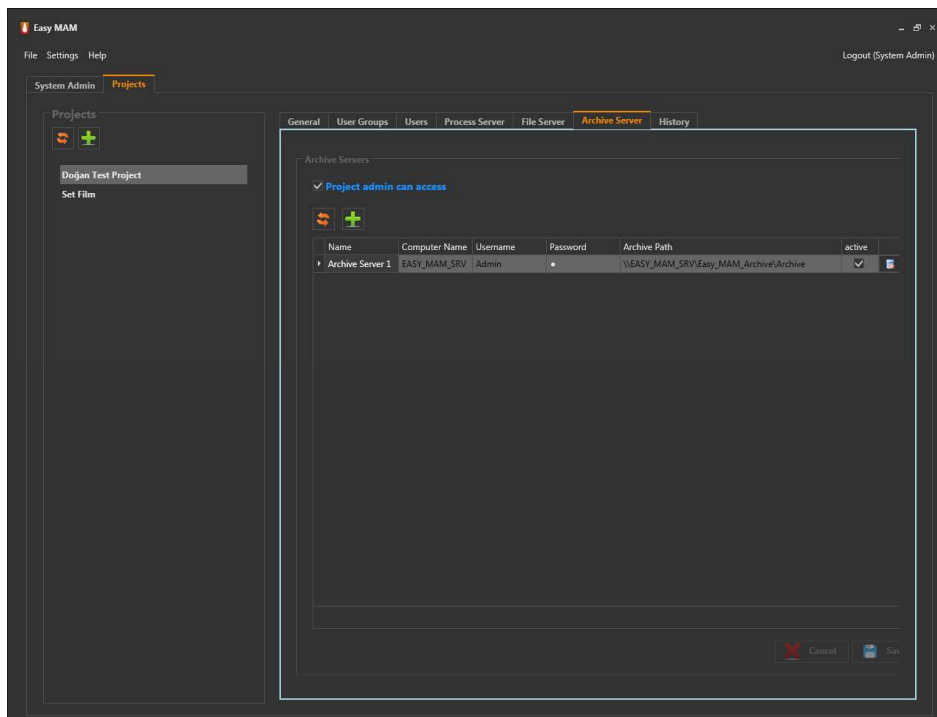

Graphics 12 : File Server

3.2.6 Archive Server

Archive server information can be shown in this section.(Graphics 13) And a new server can be added using

the  button (Graphics 13)

Graphics 15 : Easy MAM Main Window

Graphics 16 : User Login

4.1 Admin Panel

It can make changes to the project within the project administrator privileges After logging project. It is situated in the admin panel as Graphics 17 for changes.

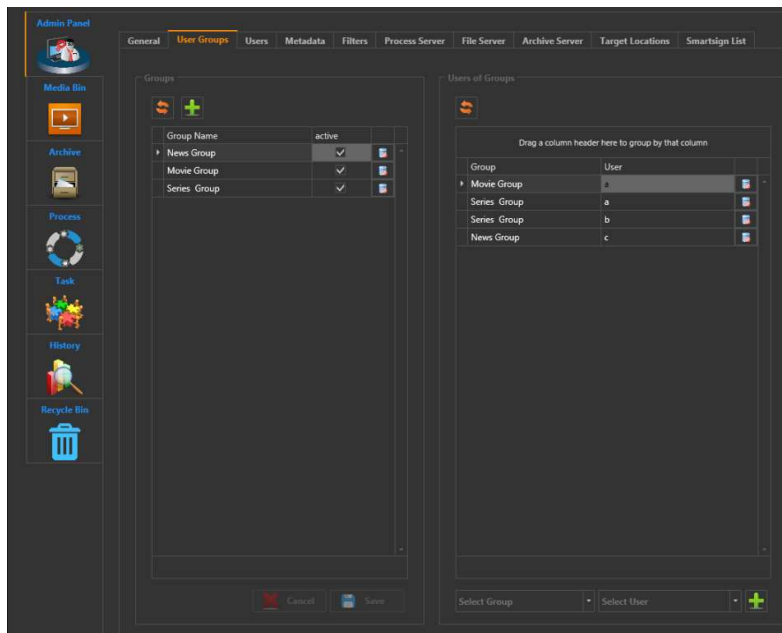

Graphics 17 : User Admin Panel

4.1.1 General

Project admin can set project name,database,server,language in this tab. (Graphics 17)

4.1.2 User Groups

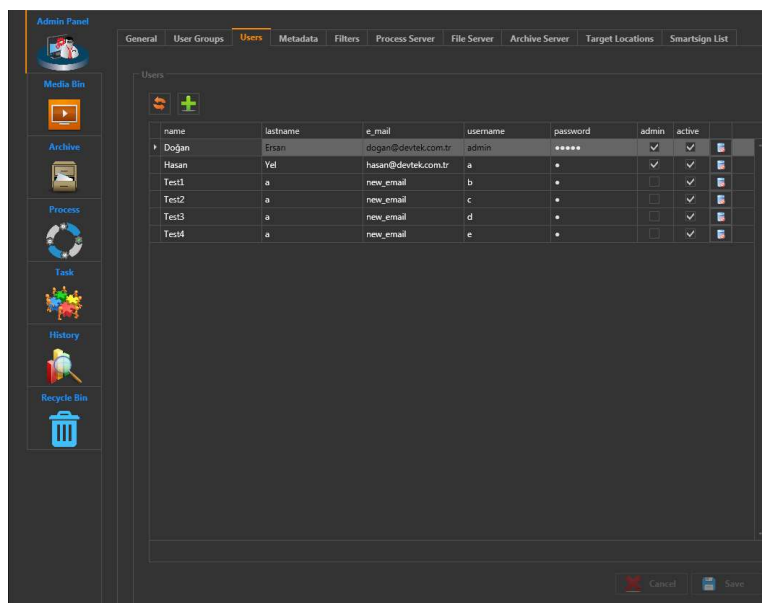

Project admin can delete or change user groups in this.(Graphics 18)

Graphics 18 : User Groups

4.1.3 Users

User identification, user authentication,password,username can set in User tab.(Graphics 19)

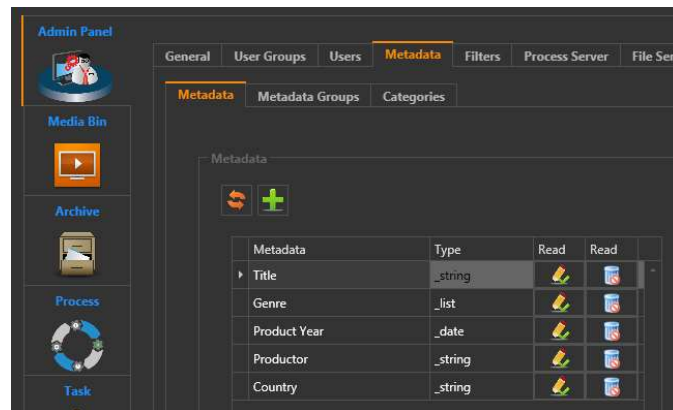

Graphics 19 : Users

4.1.4 Metadata

Metadata tab consists of 3 parts.

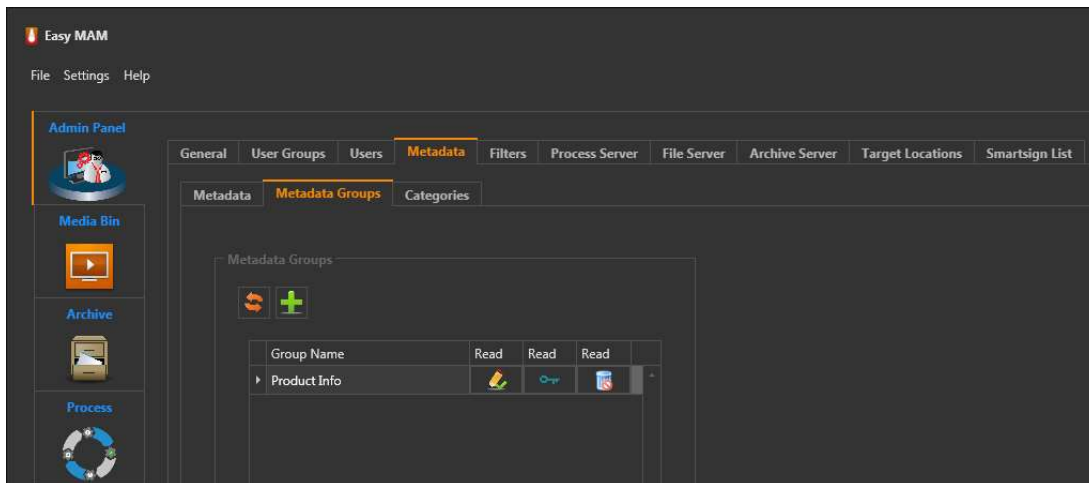

4.1.4.1 Metadata

Data types are specified in the mam under this tab.(Graphics 20)

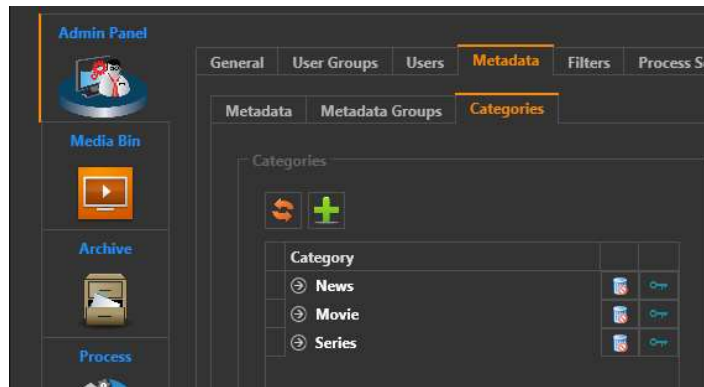

Graphics 20 : Metadata

4.1.4.2 Metadata Groups

Graphics 21 : Metadata Groups

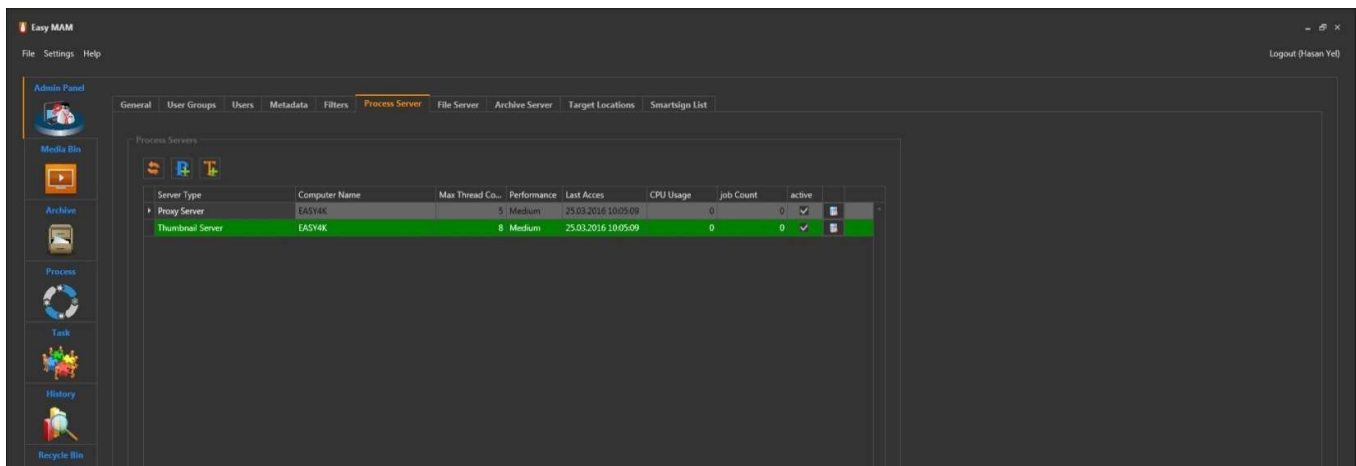

4.1.4.3 Metadata Categories

Graphics 21 : Metadata Categories

4.1.5 Process Server

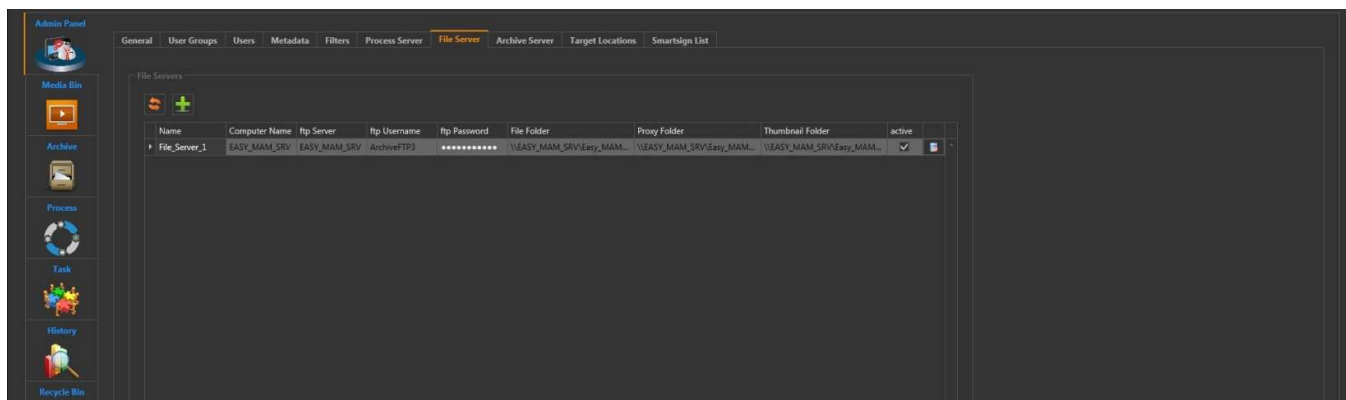

Thumbnail server and proxy server are hosting in the process server. New server can be added and can observe current work situation in this tab. Proxy server can be added by using  button.  button is used for adding thumbnail server. (Graphics 22)

Graphics 22 : Process Server

4.1.6 File Server

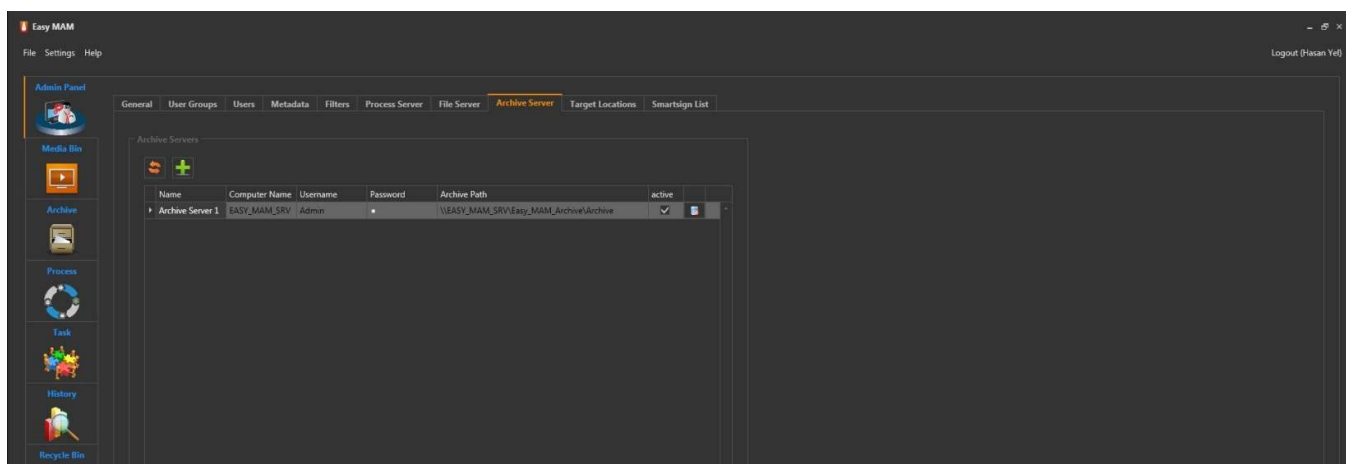

File server to store the file information is entered in this section and new servers can be added. As well as active server can be made passive or active.(Graphics 23)

Graphics 23 : File Server

4.1.7 Archive Server

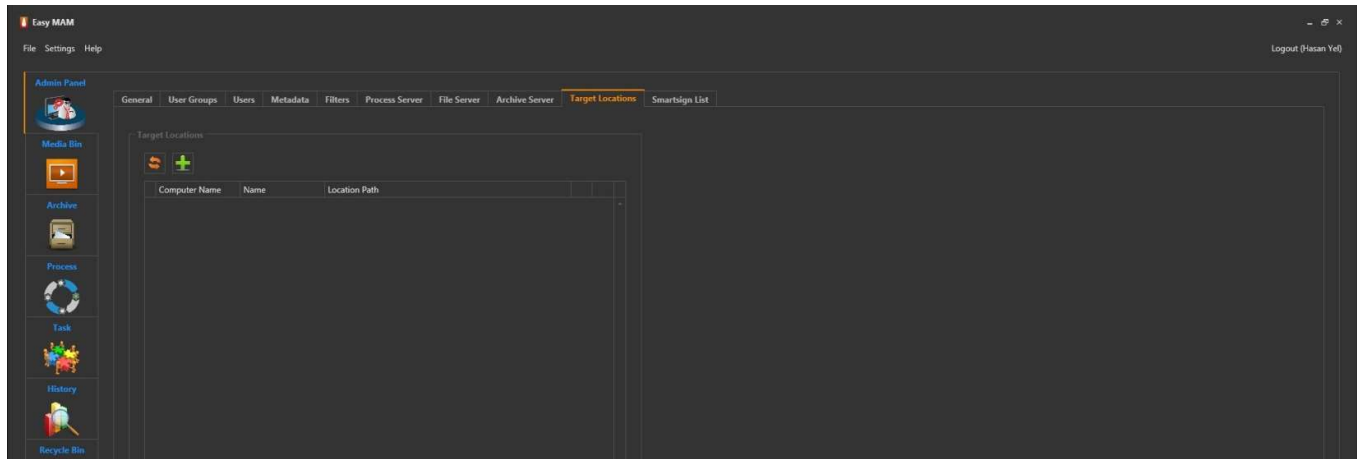

A server to store the files to be sent to the archives of information are entered under this tab. It s also a new server can be added.(Graphics 24)

Graphics 24 : Archive Server

4.1.8 Target Locations

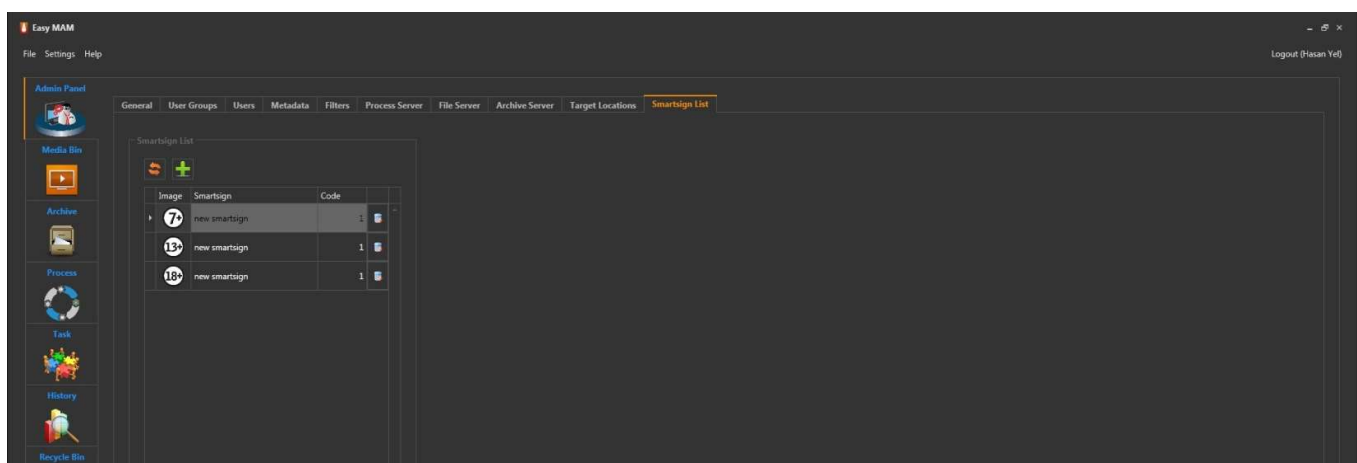

MAM users' computers and files they want to send the current location of a file can be set under this tab.(Graphics 25)

Graphics 25 : Target Locations

4.1.9 Smartsign List

Smartsigns icon can be added or delayed in this section.(Graphics 26)

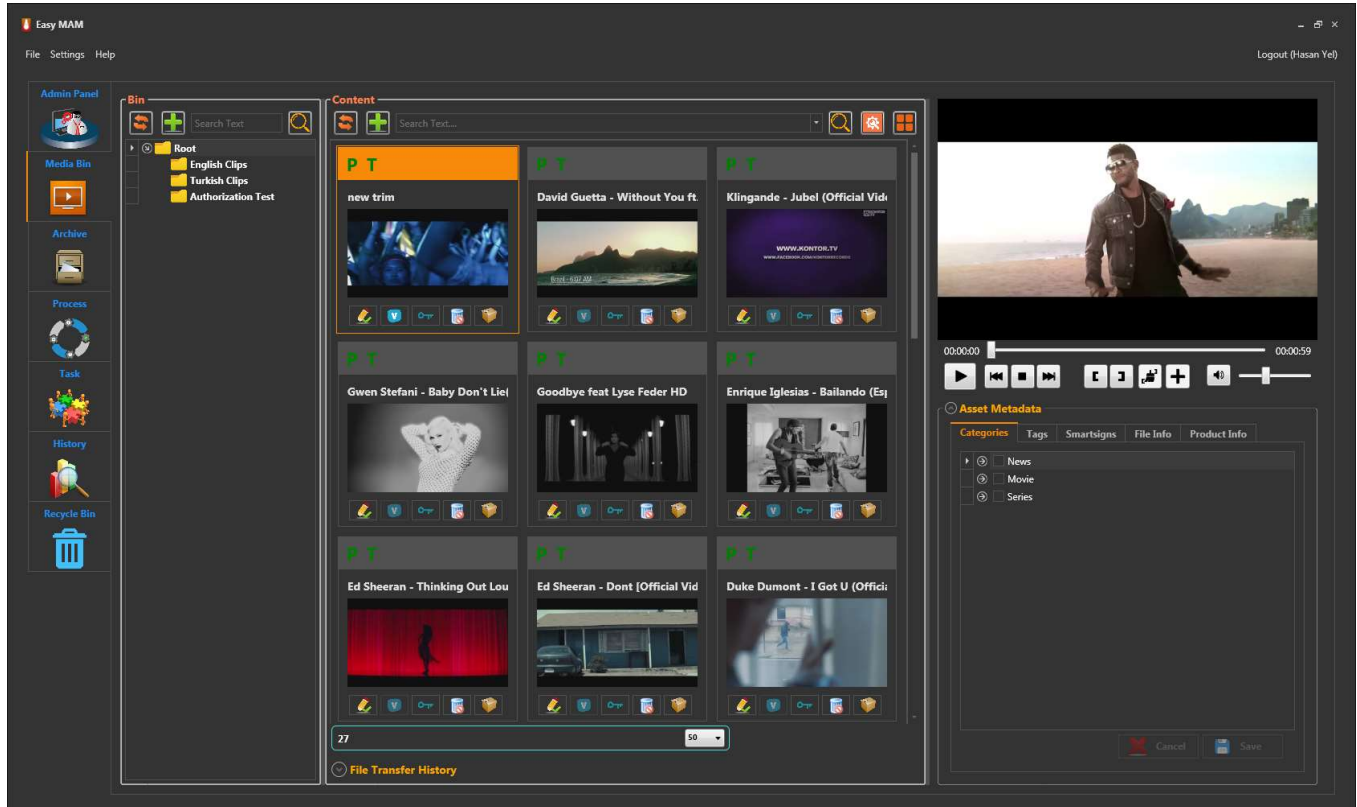

Graphics 26 : Smartsign List

4.2 Media Bin

4.2.1 Bin

Easy MAM folders can be appeared in this section or new folders can be added.(Graphics 27)

Graphics 27 : Bin

button is used to add new folder to Bin. When no folder is clicked if click button new folder is created in root folder.(Graphics 28). When a folder is selected if click button new folder is created in the selected folder.(Graphics 29)

Graphics 28 : Bin

Graphics 29 : Folder Adding

look refreshed when changes are made in Bin after click  button

In the Bin can be searched to locate the desired folder by using  button (Graphics 30).

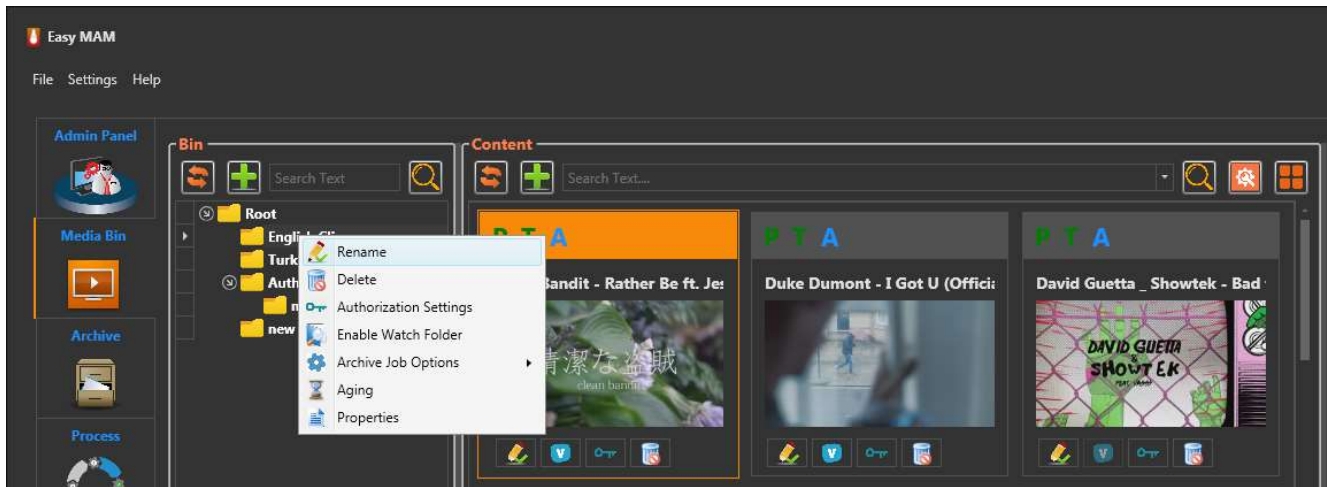

Graphics 30 : Folder Search

When in the Bin folder, right click on any folder opens a small window below the 31 Graphics.

Rename : To change folder name.

Delete : To delete folder.

Graphics 31 :

Authorization Settings : Here deletion of users and groups on that folder is set as the authority to make changes.(Graphics 31)

Graphics 32 : Authorization Settings

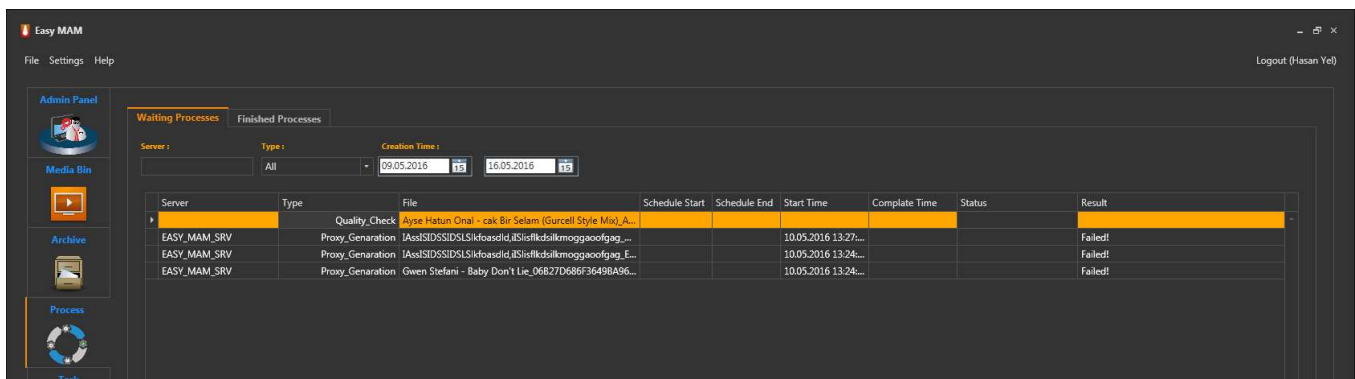

Enable Watch Folder : The previously set, if there is a follow-up file folders to control this option is selected, the property will be active. However, if there is no folder previously set the warning will be seen such as Graphics 33.

Graphics 33 : Watch Folder

Archive Job Options :

Make QC : Quality check process is performed to check whether the content is suitable for publication process through the process tab to see the process progress can be monitored.(Graphics 34)

Graphics 34 : Quality Check

Schedule : Content of the set time to go through the process is carried out at a certain time in Quality Check. Time can set in schedule screen.(Graphics 35)

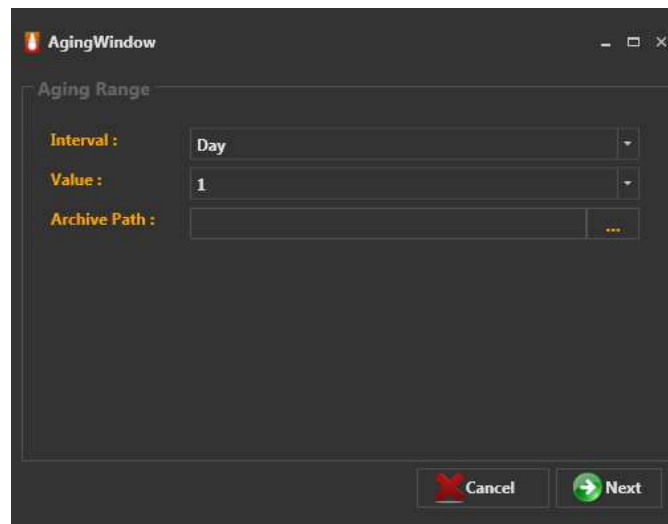

Run Immediately : Use this option to immediately begin the process of quality check.

Do nothing : This option is scheduled to be activated for any actions.

Graphics 35 : Schedule

- Aging** : Aging property is used archiving of for a long time unused files.(Graphics 36) In this window ;
- Interval** : Days, weeks, months, years specified as options.
- Value** : Time is entered according to the value of the interval option.
- Archive Path** : Folder is shown archived files.

Graphics 36 : Aging

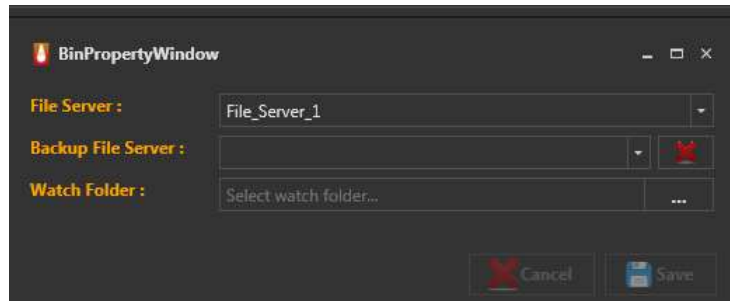

Properties

information of bin is held In the properties section

- File Server** : Specifies the name of the server.

Backup File Server : Select back up server.

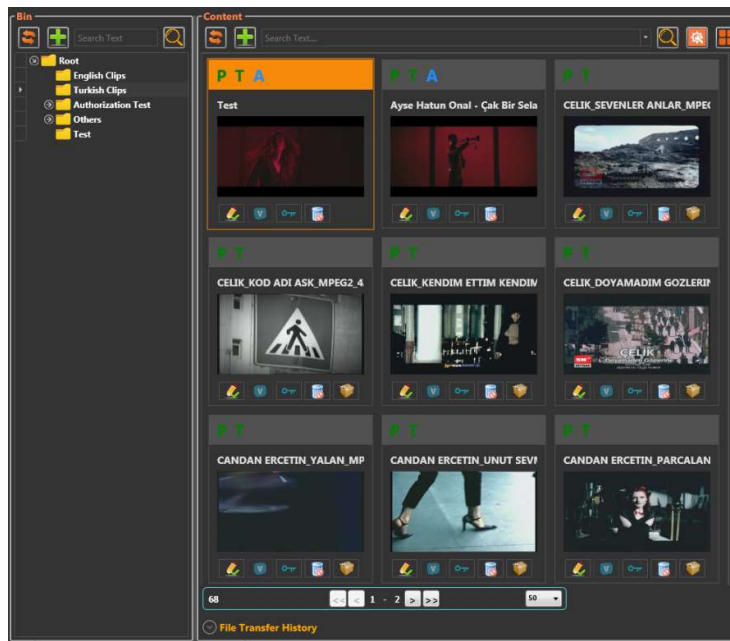

Watch Folder : When a new file is added to any folder If asked to appear automatically this folder path is specified in the watch folder. Easy to MAM specified intervals makes the control of the files in this folder.

Graphics 37 : Bin Properties

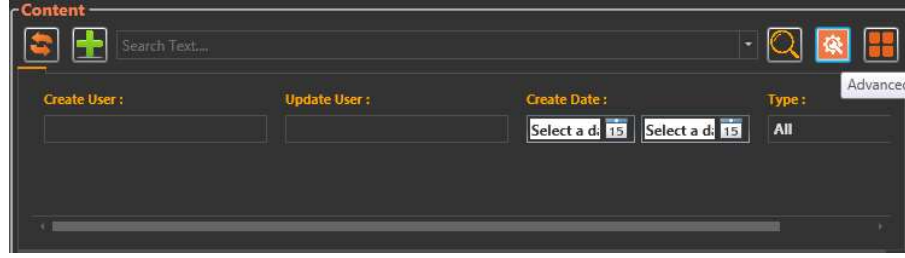

4.2.2 Content

Viewing of the found files in the selected folder, be sent to the archives, creation proxy and thumbnail, file search such operations can be carried in the content section.

Graphics 38 : Content Window

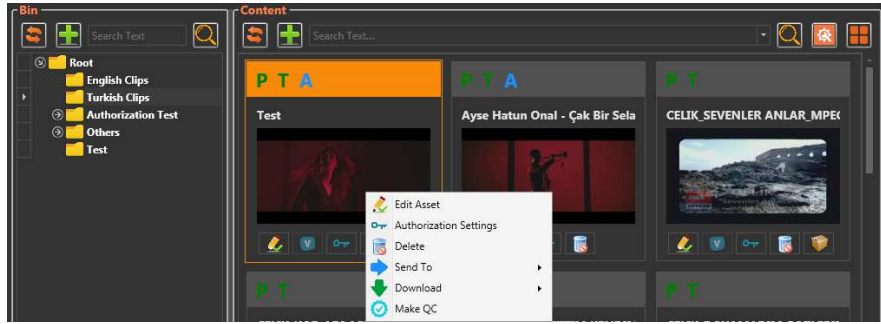

File searching can be done in the folder by using  button. Detailed search can be done by using  button. (Graphics 39)

Graphics 39 : Detailed Search

 butonu ile content içerisine yeni içerik eklenebilir.Yapılan değişikliklerin görünmesi için de  butonu kullanılır.

Content penceresi içerisinde herhangi bir içerik üzerinde mouse ile sağ tıklandığında Graphics 40 daki gibi seçeneklerle karşılaşılacaktır.Bu seçenekler şu şekildedir.

Graphics 40 : İçerik Özellikleri

- Edit Asset** : Bu kısımda içeriğe ilişkin metadata bilgileri düzenlenebilir.Asset Metadata kısmında detaylar bulunmaktadır.(Sayfa 29)
- Authorization Settings** : Kullanıcı yetkileri ayarlanır.(Graphics 32)
- Delete** : İçeriği silmek için kullanılır.
- Send to** : Mouse ile send to üzerine gelindiğinde iki seçenek görünmektedir.(Graphics 43)Bu seçenekler :
- 1.Archive : Bu seçenek ile içerik daha önceden belirlenmiş olan arşiv server a gönderilir.Arşive gönderilen içerik üzerinde mavi renkte A harfi görülmektedir.
 - 2.Target : Bu seçenek ile de içerik istenilen hedefe gönderilecektir.

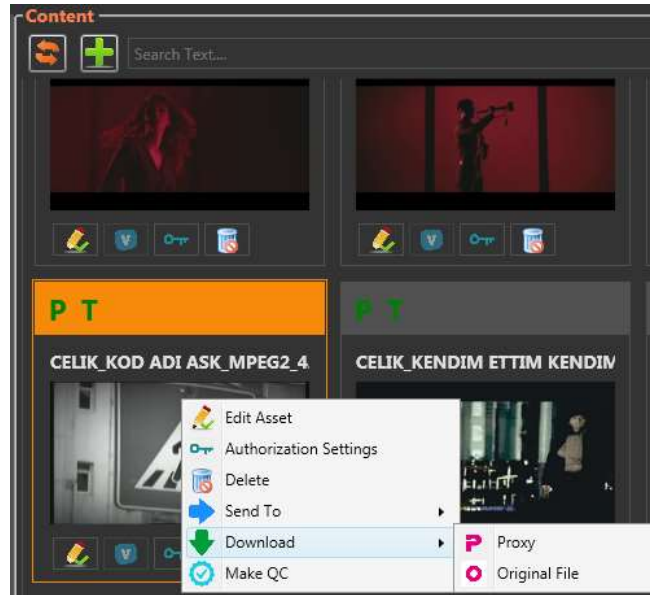

Graphics 41 : İçerik Gönderme

Download : Mouse ile download üzerinde gelindiğinde de iki seçenek ile karşılaşılır.(Graphics 41)

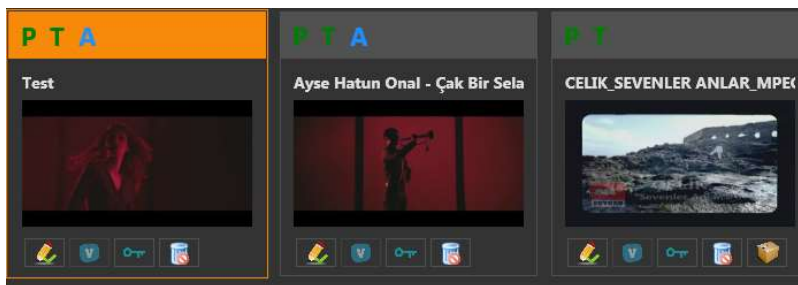

1.Proxy : Bu seçenek ile içeriğin proxy'si bilgisayara indirilir.

2.Original File : Bu seçenek ile içeriğin orjinal hali bilgisayara indirilir.

Make QC : Seçilen dosya için Quality Check yapılır.

Graphics 42 : Download

Graphics 43 : Content

Content bölümündeki thumbnailer üzerinde bazı simgeler yer almaktadır. Fotoların üst kısmında yeşil renkte P harfi varsa bu içeriğin proxy dosyası oluşturulmuş demektir. Yine yeşil harfli T harfi varsa Thumbnail oluşturulmuştur. Mavi renkli A harfi ise içeriğin arşive gönderildiğini belirtir. Bir dosya arşive gönderilmiş ise Graphics 43'de görüldüğü gibi resmin altında yer alan simgelerden  arşiv simgesi kaybolmaktadır. Burada yer alan diğer simgelerin görevi ise

: İçeriği silmek için kullanılır.

: İçeriğe ait versiyon bilgisini gösterir.

: Yetkilerin düzenlenmesi için kullanılır.

: İçeriği editlemek için kullanılır.

4.2.3 File Transfer History

Asset	Filename	Start Time	Complete Time	Status	Result
▶ Ayse Hatun Onal - Çak B...	D:\Video\MP4 HD Türkç...	25.03.2016 10:09:...	25.03.2016 10:09:...		226 Successfully transferred "/Files/Ayse

Graphics 44 : File Transfer History

Arşiv veya herhangi bir hedefe gönderilen ya da bu kaynaklardan alınan dosyaların transfer durumları bu kısımdan takip edilebilir. (Graphics 44)

4.2.4 Preview

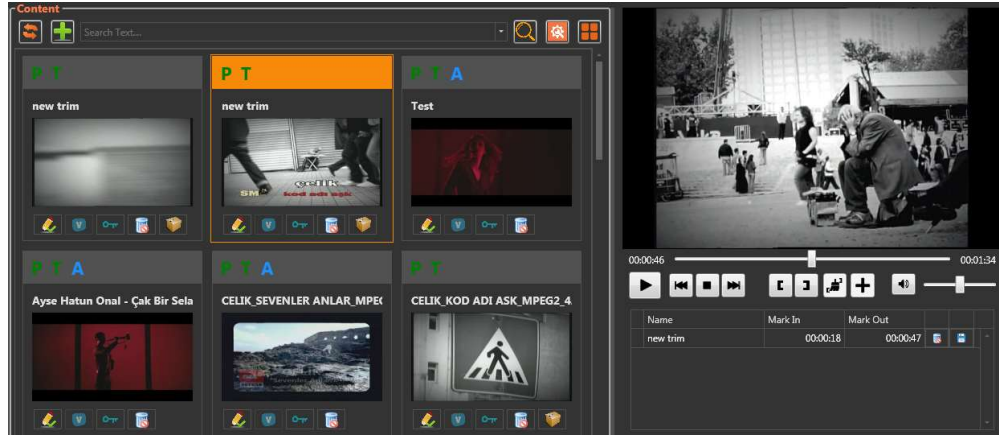

İçeriklerin ön izlemesinin yapılması için preview kısmı kullanılmaktadır.Bu kısım ön izleme haricinde başka özelliklere de sahiptir.

Graphics 45 : Preview

-  : Play butonu seçilen içeriğin oynatılması için kullanılır.
-  : Rewind butonu oynatılan video üzerinde 1 saniye geriye gitmek için kullanılır.
-  : Stop butonu oynatılan videoyu durdurmak için kullanılır.
-  : Forward butonu oynatılan video üzerinde 1 saniye ileriye gitmek için kullanılır.
-  : Trim in butonu izlemesi yapılan içeriğin belirli bir bölümü kullanılmak isteniyorsa burada "in" vermek için kullanılır.
-  : Trim out butonu izlemesi yapılan içeriğin belirli bir bölümü kullanılmak isteniyorsa burada "out" vermek için kullanılır.
-  : Clear butonu işaretlenen trim in ve out noktalarını temizlemek için kullanılır.
-  : Add butonu seçilen trim noktalarındaki aralığı yeni bir içerik olarak eklemek için kullanılır.
-  : Ses butonu sesi kapatıp açmak için kullanılır.

İçerik üzerinde trim işlemi gerçekleştirildiğinde preview kısmında new trim olarak görülmektedir.Oluşturulan yeni içerik aynı zamanda content kısmına da new trim olarak eklenecektir.(Graphics 46)

Graphics 46 : Trim

4.2.5 Asset Metadata

İçeriğe ilişkin metadata bilgileri Asset Metadata kısmında görüntülenebilir ve değiştirilebilir. Bu kısımda bulunan bölümler şu şekildedir.

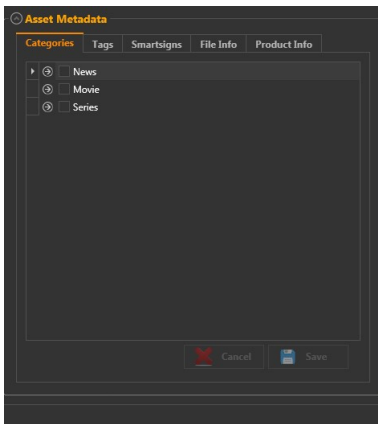

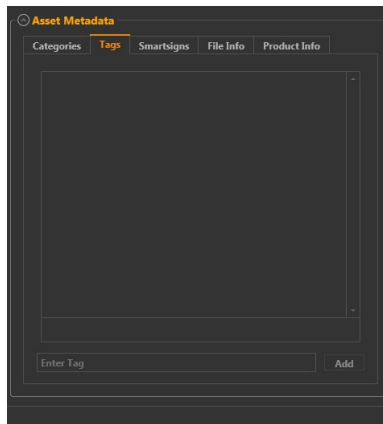

Categories : Bu kısımda içeriğin bulunduğu news, movie gibi kategoriler düzenlenebilir. (Graphics 47)

Tag : Tag kısmında içeriğe ilişkin arama esnasında kullanılacak tag ler eklenip düzenlenebilir. (Graphics 48)

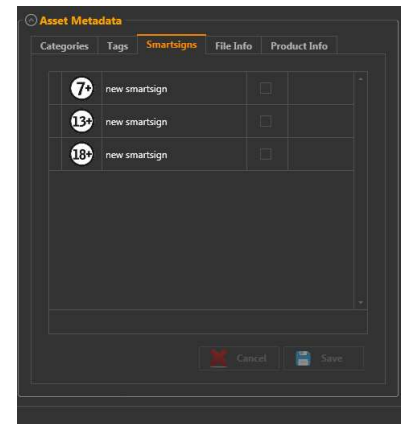

Smartsigns : İçerik yayınlanacağında kullanılacak smartsign simgesi bu kısma düzenlenmektedir. (Graphics 49)

File Info : İçeriğe ait video değerleri, ses değerleri gibi teknik özellikler buradan gözlemlenebilir. (Graphics 50)

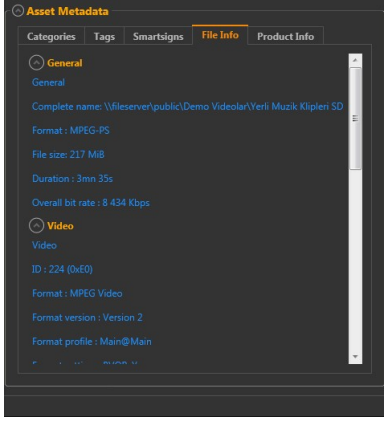

Product Info : İçeriğe ilişkin ülke, oluşturma tarihi, oluşturan gibi bilgiler buradan ayarlanmaktadır. (Graphics 51)

Graphics 47 : Categories
Smartsigns

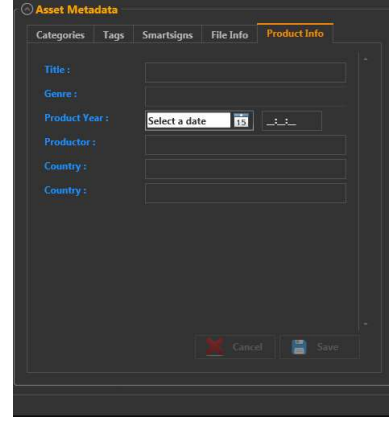

Graphics 48 : Tags

Graphics 49 :

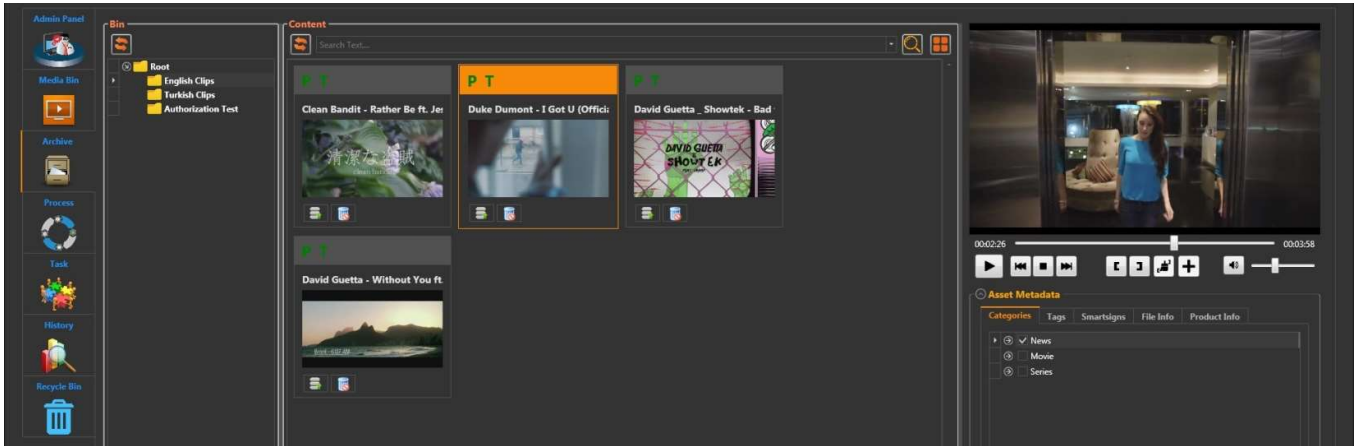

Graphics 50: File Info

Graphics 51 : Product Info

4.3 Archive

Arşive gönderilen tüm içerik arşiv içerisinde oluşturulan klasörler içerisinde bu bölümde bulunmaktadır. Burada bulunan kısımlar, ayarlar Media Bin ile aynı özellikleri taşımaktadır. (Graphics 52)

Graphics 52 : Archive

4.4 Process

Process kısmında yapılan ve yapılmakta Proxy oluşturma,arşive gönderme gibi işlemler görüntülenebilir.Aynı zamanda bu işlemler içerisinde işlem türüne,tarihine,server bilgisine göre arama yapılabilir.Process kısmı Waiting Process (Graphics 53) ve Finished Process (Graphics 54) olmak üzere iki bölümden oluşmaktadır.
